Grote

The first name in vehicle safety systems®

Since 1901

Grote Industries has been a company founded on the principles of customer, innovation and quality. The company started in plastics during the beginning of the 20th century, and has continued to focus on its customer needs and its core innovative approach to solutions to propel new markets and continued success. The transportation industry has been the core focus for almost 80 years. During the past 100 years the company has grown from a small US manufacturer into a multinational company with locations on three Continents.

Customer Innovation

Grote is a world wide leader in developing and producing vehicle safety systems for a variety of vehicles (applications). Utilizing the latest manufacturing and design systems Grote manufactures its products all over the world to the highest quality and production standards.

Grote develops innovations that bring performance and cost savings to our customers operations. Starting with a deep understanding of the markets our customers operate in, Grote designs products that perform in extreme conditions that lower overall operating costs. From product concept, to rapid prototypes, Grote's speed to market is enhanced by having complete in-house design and production capabilities. All of this brings our customers the highest performing lighting and electrical systems at the lowest operating costs.
