

## 00780/00781/01050 Dump Bin Set Up Instructions

Step 1: Make sure you have all components.

Step 2: Check the header for damage

Step 3: Check dump bin for damage

Step 4: Open up the dump bin

Step 5: Fold one side of the long side bottom. It is a double fold, first the large crease into an "L" shape and then the small crease to fit into the pre-cut tab. Then repeat on the other side.

Step 6: Fold over the re-forcing side flaps- a single “L” shape fold...repeat for the other side

Step 7: Flip the bin over and fold down the floor tabs for added stability

Step 8: Fold the divider in half at the crease and then fold the side tabs...place the divider into the bin to help hold up the header card.

Step 9: Place the header into the dump bin using the divider to wedge into place. The divider will hold the header up until product is placed into the bin. Make sure that pre-cut slits are behind the header for the best appearance.
