Looking for a fast, more convenient and economical way to manage wire and cables on a vehicles chassis or under the hood applications?

Grote's Releasable Dual Clamp Cable Tie offers a great solution! The clamp is specifically designed to provide parallel spacing between hoses, wire and cable components and tubing applications.

The Dual Clamp Cable Tie is completely releasable and reusable saving time and money!

Dual Clamp Nylon Cable Ties

These new clamps are ideal for use under the hood cable and wiring applications and for wire harness management.

- Releasable and reusable for convenient use in many applications
- Excellent substitute where conventional 'P' clamps are used
- Very effective for cable and wire management under the hood or chassis
- Provides protection from abrasion and curling of wires
- Clamps have an optional mounting hole for securing bundles along the chassis of trucks, trailers and automobiles
- The unique, one-piece design features the dual head centered on the strap ensuring proper, equal spacing
- Choose from 1 ¼" bundle maximum or 2 ¼" bundle maximum clamps
- Clamps are UV Protected with a temperature range from -40°C to +85°C
- Tensile strength rating of 150 lbs

DIMENSIONS:
1/4" mounting hole

83-6040 2 x 1 ¼" bundle maximum
83-6041 2 x 2 ¼" bundle maximum
