

# 3" THIN-LINE MARKER LIGHTS CHANGE NOTIFICATION

CURRENT STATE

FUTURE STATE

As part of Grote's commitment to continuous product improvement, changes are being implemented to the **Grote 3" Thin-Line Lamps**.

Grote's 3" Thin-Line Lamps have been newly redesigned to fulfill P2, PC, and ABS requirements with fewer lamps. This versatility will allow maintenance managers to consolidate part numbers and handle fewer SKUs. Now produced at Grote de Mexico, the 3" Thin-Line Lamps also feature an improved lens-to-housing weld tucked under the sealed lamp, making them much more durable and damage resistant. Additionally, the improved weld removes the need for potting and make the lamps less susceptible to moisture and chemicals.
