

GROTE LAMPS CARE

The use of solvents and/or cleaners which are not chemically compatible with polycarbonate, acrylic and ABS will result in the softening, crazing, and/or cracking of the plastic parts and its mounting bases.

PROPER WAY TO CLEAN GROTE LAMPS	IMPROPER WAY TO CLEAN GROTE LAMPS
Use warm water; mild detergents are okay	Strong acid (pH 1–3) not recommended on polycarbonate or acrylic material
Wipe with a soft bristle brush or sponge	Use of alcohol not recommended on acrylic or ABS material
Test all cleaners on sacrificial lamps for compatibility	Use of strong alkali (pH 11–14) not recommended on polycarbonate or acrylic material
Thoroughly rinse all cleaners from lens after application	

Note: pH level of the cleaner can be obtained from MDS.
