STANDARD

**SPECIFICATIONS**

PLUG: SAE J560  
CABLE: SAE J2394 (ABS)  
OPERATING RANGE:  
-55°F TO 190°F / -48°C TO 87°C

**PLUG DESIGN**

Crush-resistant, weather-tight elastomeric material      Solid brass, nickel-plated pins

**CABLE-TO-PLUG SEAL**

Wire jacket is molded into the plug sealing it from the elements and eliminating the need for a spring.

**SUPERIOR POWER CORDS THAT PROVIDE MAXIMUM RELIABILITY IN THE HARSHTEST ENVIRONMENTS**

The crush-resistant design of Grote's ULTRALINK™ Power Cords means they can survive being run over by a heavy-duty vehicle, while conventional hollow core designs are permanently deformed and rendered useless.

**FEATURES & BENEFITS**

- ULTRALINK™ power cords exceed minimum legal lamp power delivery requirements for single or double trailer configurations
- Zinc die-cast plugs filled with elastomeric material that resists crushing; acts as potting to seal solid brass terminals from moisture
- Provides excellent recoil memory, chemical, abrasion resistance
- Adhesive bonds cable to plug, eliminating need for supporting spring and preventing moisture from entering the back of the plug
- Corrosion resistant solid brass terminals provide superior current capacity with minimal voltage drop
- Advanced polymer jacketing material provides complete sealing and abrasion protection between -55°F and 190°F (*premium versions*)
