

GROTE LIGHTING SOLUTIONS

INNOVATIVE TECHNOLOGY FOR A SAFER WORLD

GROTE LIGHTING THE WAY

From design to production, Grote's focus on innovation and safety delivers unrivaled customer satisfaction

Grote is committed to working with you to find just the right solution for your equipment and customers. For over 120 years and counting, Grote's steady flow of technological innovations have been lighting the way toward a safer and more connected world.

PARTNERSHIP

Grote is dedicated to collaborating with the right team from day one, developing strong working relationships with our customers in order to start development smoothly and easily transition to production.

COMMITMENT

With dedicated resources and top-down attention, Grote is committed to the development of smart visibility systems as an important facet of our strategic future.

CAPABILITIES

Our innovation and focus on the heavy-duty market enables us to design reliable solutions that work in even the toughest environments.

GLOBAL

Our vertically integrated, global supply chain is a major key to success, allowing us to continue to lead our industry by delivering on our commitments using the right global footprint.

DEVELOPING CUSTOM LIGHTING SOLUTIONS

Innovative Design

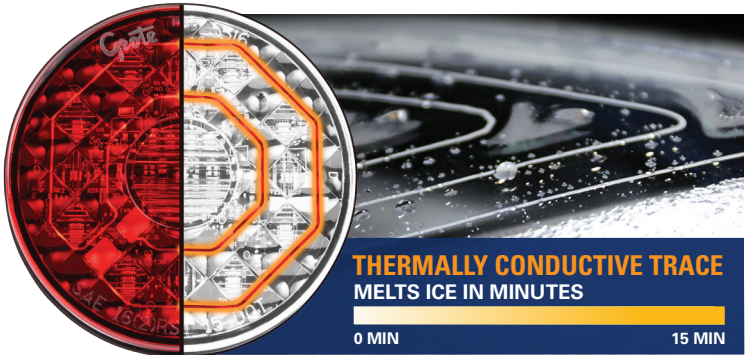

Grote brings a team of experts to the process of designing and developing lighting solutions. When paired with our best-in-class light engines, proprietary deicing technology, striking signature designs, and rugged, durable construction, the result is a solution that is custom-made for your needs.

We put quality, durability, and customer satisfaction at the forefront of our design, ensuring that our products easily withstand the stresses of the demanding environments in which our customers work.

Deicing Maximizes Uptime and Increases Profitability

Grote knows the importance of uptime to your customers, which is why we carefully designed our heat grid to melt away layers of snow and ice in just minutes and actively prevent additional ice buildup. This proven system increases uptime and safety in the harshest winter environments and provides the driver maximum visibility to stay focused and alert. In humid environments, the grid continues to maximize safety by eliminating condensation, which leads to a safer road for everyone.

GROTE: THE EXPERT IN HEAVY-DUTY LED LIGHTING

Our customers are continually innovating, developing vehicles and equipment requiring more advanced lighting solutions. To support this, Grote is continuously creating new lighting features designed specifically to provide optimal visibility, durability, and value – and to be as rugged as the vehicles for which they were built.

Grote didn't become the leader of the heavy-duty lighting industry overnight. Years of evolving and perfecting the process have gone into ensuring that "best-in-class" quality is in everything Grote creates.

GROTE WORLD-CLASS SIGNAL LIGHTING

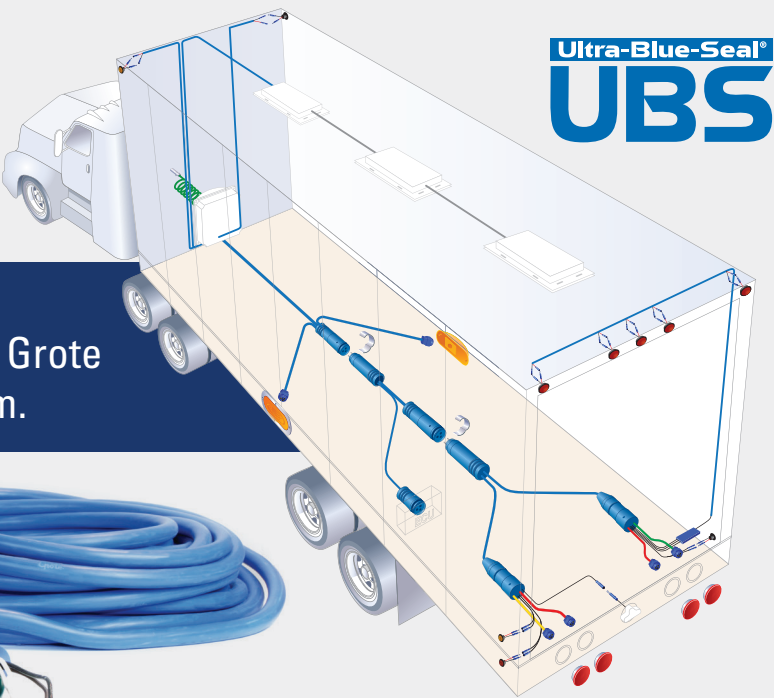

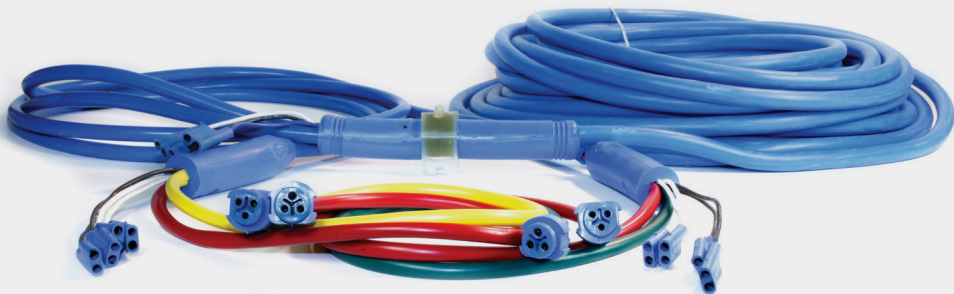

At Grote, safety is our number one priority. Designed with reliability in mind, our high-quality LED signal lamps bring safety and peace of mind to the worksite. From stop/tail/turn lamps to clearance markers and warning lights, Grote's signal lighting will help your equipment stay visible even when facing low or bad lighting conditions. Our LED technology increases lamp longevity, ensures lower energy usage, and minimizes downtime due to maintenance. Rugged construction and encapsulated electronics ensure that these lamps function in the toughest environments.

GROTE ULTRA-BLUE-SEAL HARNESSES

Grote's UBS harness systems are designed to prevent unplanned downtime over the life of the trailer. They're modular for flexibility and totally sealed to keep out the moisture, chemicals, and corrosion found in today's highway environment.

Grote's UBS harness and plugs are specifically designed to function with Grote lamps as a seamless, cohesive system.

A VISION FOR SAFETY & ROI

4SEE by Grote was developed with a vision of making our world safer and smarter through connected visibility. It offers superior data dependability, with all smart components being connected through the robust 4SEE Digital Harness. Fleet managers love that it gives them a centralized solution for their dedicated data stream and an online portal through which to manage their trailer fleet.

We know that when it comes to business operation solutions, it can't be one size fits all. That's why 4SEE is a modular tool that can be modified and added to based on your unique business needs. To help determine the right solution for your fleet, connect with one of our experts for a free consultation!

A GLOBAL FOOTPRINT FOR A GLOBAL INDUSTRY

Our customers aren't limited to one region of the world and neither are we. With eight strategically located, vertically integrated facilities around the world, Grote Industries can deliver the supply-chain security your customers need.

Grote's global footprint allows us to invest in making our supply chain as tough and resilient as our products. From implementing risk-mitigation strategies and promoting supplier development programs, to multi-sourcing components and in-sourcing critical technologies, Grote is constantly working behind the scenes to ensure that we always have the products that you and your customers need.
