VISIBILITY & SAFETY MATTERS

CHOOSE THE RIGHT PRODUCT FOR YOUR SPECIFIC APPLICATION AND NEED.

YOUR SAFETY AND THE SAFETY OF OTHERS DEPENDS ON IT!

Not all warning lights are created equal.

Know the certification and regulations for your application and choose the products that will work as hard as you do! Safety first and foremost! Choose from a variety of mounting options including permanent, magnetic and vacuum/magnet mount solutions.

Select the proper mounting option for your specific needs and application.

Permanent mount lighting options should be used for vehicles that will be utilized in over the road application. Magnet or Vacuum/Magnet mounted lighting options should only be used on vehicles that are not in motion, ie: stationary at a job site, off to the side of the road etc.

You need to be seen while you are working and others need to see you — be visible at all times!

ELECTRO-MAGNETIC COMPLIANCE

No need to worry about Electro-Magnetic Compliance (EMC). Grote's new line of LED Lighting products have been put through rigorous Electromagnetic Interference (EMI) and Radio Frequency Interference (RFI) testing to help ensure our customers will have years of worry free operation.

When it comes to audible warning devices, not all backup alarms are the same.

Choose the backup alarm that best suits the conditions that the alarm will be used in. Grote offers a wide variety of alarms including heavy duty, medium duty and light duty options. These alarms offer a variety of audible tones. Our alarms are available with standard beeping, or adjustable output levels and the newest multi-frequency alarms for coverage in all conditions and applications.

Grote's backup alarms are available in both surface mount and grommet mount options and are designed and manufactured to perform in today's difficult and harsh environments.

Choose the right alarm that will best suit your unique environments.

SAE STANDARDS/CERTIFICATIONS

WHAT WE NEED TO KNOW AND WHY

There are 2 Primary SAE Certifications to be aware of:

SAE J845 – Omnidirectional Optical Warning Device

A flashing optical warning device that projects light in a horizontal 360 degree arc and vertically from 5 degrees up to 5 degrees down. It will appear to project flashes of light to an observer positioned at a fixed location. The flashes of light may be a repetitive signal or a non-repetitive signal. If a non-repetitive signal is used it shall be a block of repetitive signals that have been characterized. This would include all 360° beacons.

SAE J595 – Directional Flashing Optical Warning Device

A flashing optical warning device, in which the light source produces flashes of light, which is directionally aimed and will project a signal over a minimum area from 20° right to 20° left in a horizontal plane and from 10° up to 10° down in a vertical plane. The flashes of light may be a repetitive signal or a non-repetitive signal. If a non-repetitive signal is used it shall be a block of repetitive signals that have been characterized.

S-LINK TECHNOLOGY

S-Link System is a proprietary technology that will allow similar S-Link products to be synchronized. This would allow for a user to define the flash patterns on multiple devices for a customized, tailored look on a vehicle.

Note: Only S-Link compatible products can be synchronized together. Refer to user installation manuals for details on S-Link Synchronization.

CLASS I, II, III

WHICH IS TO BE USED AND WHERE?

Class I Optical Warning Devices

Primary optical warning devices for use on authorized emergency vehicles responding to emergency situations. These devices are utilized to capture the attention of motorists and pedestrians and warn of a potentially hazardous activity or situation.

Typical Usage

Fire, Police, Ambulance and Rescue vehicles – Authorized vehicles that travel faster than the speed of traffic

Class II Optical Warning Devices

Primary optical warning devices for use on authorized maintenance or service vehicles to warn of traffic hazards such as a lane blockage or slow moving vehicle.

Typical Usage

Utility, Roadside Assist vehicles, construction vehicles – Over the road vehicles travelling at the speed of traffic or stopped at the side of the road

Class III Optical Warning Devices

Primary optical warning devices for use on vehicles authorized to display an optical warning device for identification only.

Typical Usage

Forklifts, yard work machines

BACKUP ALARMS

FEATURES & BENEFITS

- Rugged construction Glass-Filled Nylon housings
- Universal mounting including grommet mounted products
- Available in a range of Decibel output levels to fit a wide variety of application needs
- Select the best output level based on environment and ambient noise levels where the alarms will be in use

Voltage: 12 to 24 VDC

Amp Draw: 0.1 AMPS – 0.5 AMPS @ 12 VDC

LED BEACON, CLASS I, TALL DOME

DUAL COLOR, PERMANENT MOUNT

78013

78015

78010

FEATURES & BENEFITS

- 12 different selectable flash patterns in either of two phases, plus steady-on
- Durable polycarbonate inner lens and outer dome
- Clear, smooth outer dome for easy cleaning and inner lens protection
- Heavy duty spun aluminum base with plastic base insert
- Designed for a wide range of light and heavy duty vehicles
- S-Link™ System* synchronizing capabilities with up to six other units (for hardwire models only). Allows for synchronization with other S-Link compatible products
- High-Low power available on single color beacons
- Ability to isolate colors on dual color models
- 5 year warranty

Voltage: 12 to 24 VDC

Amp Draw: 0.6 amps @ 12 VDC, 0.3 amps @ 24 VDC

LED TRAFFIC DIRECTORS/ARROWS

FEATURES & BENEFITS

- Made from durable extruded aluminum — Traffic Directors will not warp or bend
- Micro-processor control unit offers four modes with distinctive flash options
- Front load for easy replacement of individual heads
- Modes: left arrow, right arrow, center out, and warn (alternating)
- Ships complete with back lit control unit, attached quick-disconnect wire harness (15' standard), L-brackets, hardware, and instructions
- 5 year warranty

Voltage: 12 VDC **Amp Draw:** 1.1 amps @12V DC

LED TRAFFIC DIRECTORS

98343

FEATURES & BENEFITS

- 34 customer selectable warning flash patterns plus 5 phase options
- Made from durable extruded aluminum — will not warp or bend
- Front load for easy replacement of individual heads
- 20" model comes with a 2' three-wire cable (power, ground, pattern select)
- 30" & 40" models come with a 25' six wire cable, (power, ground, program wire, left enable, right enable, warn enable, center-out = L + R)
- Ideal for front push bumpers, pickup trucks, headache rack, running board lights
- Weatherproof interior or exterior mount
- 5 year warranty

BRITEZONE™ LED WORK LIGHTS

NOT ONLY DO YOU NEED TO BE VISIBLE TO BE SAFE, YOU MUST BE ABLE TO SEE PROPERLY IN THE AREAS YOU ARE WORKING

**GROTE BRITEZONE LED WORK LAMPS ARE THE PERFECT SOLUTION
FOR LIGHT WHERE YOU NEED IT WHEN YOU NEED IT!**

Grote's line of affordable LED lamps are designed to work when you need them — no excuses. Rain or shine, day or night, wet or dry — Grote's signature design, quality and performance are on display. With rugged, durable construction and LED power that far outshines halogen, BriteZone™ lamps get the job done.

Boating. Mowing. Off-roading. Working. Long after the sun goes down, you're still out there doing your thing—and you need a lamp that's as tough and tireless as you are. Grote's BriteZone™ range has the LED lamp to shed light on any use — even tow trucks, garbage trucks and forklifts — without breaking the bank.

DEAL WITH **REAL**

In a world of automated phone systems and outsourced customer service it's rare to contact **REAL PEOPLE** with **REAL EXPERIENCE** providing **REAL SOLUTIONS**. That is exactly what you get from Grote's team of expert Sales and Customer Solutions personnel.

OPEN A RELATIONSHIP WITH GROTE

When it comes to service and support, you want to partner with a company that works like an extension of your organization. From OEMs to fleet managers to our distributors, Grote's partners all around the globe find that we help maximize profitability in a way that is convenient and supportive. You can concentrate on what you do best by letting us support you with our core expertise, all while enjoying electrical connection and accessory products that are effective and proven.
