

Grote UBS Xtreme Trailer Cable

Data Sheet

PRODUCT SPECIFICATIONS

MATERIALS

PVC

RATINGS AND COMPLIANCES

SAE J1128

The Grote Xtreme trailer cable helps to combat the issues associated with extreme low temperatures. Cold temperatures can affect the flexibility of a trailer cable and Grote's new cable is designed and manufactured to solve problems related to installation, performance and repairs. The Grote Xtreme is also designed with higher temperatures in mind exceeding the industry standard of 176°F (80°C).

- Cable remains flexible in extreme low temperatures, rating -85°F to 212°F (-65°C to 100°C).
- Resistant to gasoline and oils.
- Tested to SAE J1128 standards.
- Outer PVC jacket material designed for extreme temperature.
- UV resistant.
- Combined with Grote's Ultra Blue Seal plugs for a sealed system for all climates.
- Cable configurations available for a complete XTREME UBS Harness System for OE applications. Also available in 100' spools through the Grote Accessory catalog.
