↓ 33.7%

REDUCED REAR-END ACCIDENTS

²DOT; Federal Motor Carrier Safety Administration; (83 FR 36662 & 84 FR 17910)

IT'S SIMPLE. RESEARCH SHOWS THAT IMPROVED VISIBILITY PREVENTS ACCIDENTS¹.
Outfitting your fleet with Grote's new Auxiliary Strobe & Stop Lamp may reduce the risk of rear-end collisions by more than a third.²

Those are the findings by an independent carrier based on a recent study conducted over a two-and-a-half-year period. Results indicate that by installing a pulsating amber brake light on the back of a fleet of tanker trailers, rear-end collisions were reduced by 33.7%.²

STANDARDS

SAE J595 Class II for amber warning
